DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 recites that the adapter comprises a hollow member and a posterior inner shaft. The specification does not recite or identify the recited posterior inner shaft. The substantially hollow member (27) is readable as the posterior inner shaft or a part thereof.

Allowable Subject Matter

Claims 6-11 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
